TASK FOR APPLICATION DEVELOPER

1. A simple Android Application Need to Develop by using Flutter.

2. Requirements for this Application - An Android Application when we open the application there should be an option for adding a finger print – Add Finger Print Button.

3. After that one more option to add our Name.

4. After Completing the first two steps if we log in to that application with our fingerprint the name we added to the application needs to display.

This is a very basic application the time period for completing this will be 2 days.

I request to finish the task and send us we will check it and update your results.
